

List of benefits of ACC blocks.

01

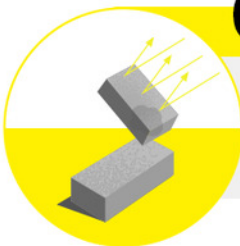

Due to bigger size of the concrete blocks, it requires lesser jointing material.

02

Due to accurate shape of the concrete blocks the thickness of the plaster is also less.

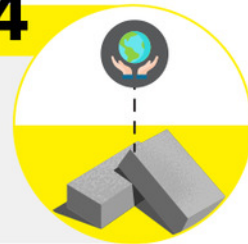

03

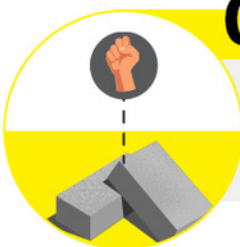

Concrete blocks have less water absorbing capacity, because of which there is less dampness in the walls.

04

Fertile soil is used for making clay bricks and wood is also burnt, whereas the process of making concrete blocks is environment friendly.

05

As compared to the bricks, the strength of the concrete blocks is better.
