

# Manufactured sand gives many benefits:

**01**

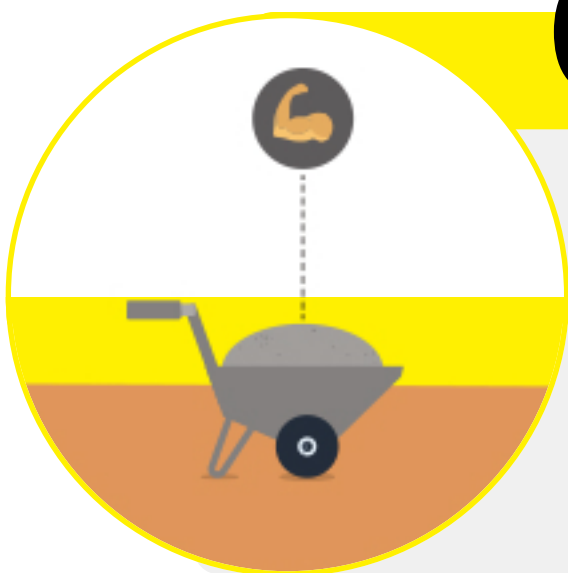

The manufactured sand is clean, unlike river sand; it does not contain clay, soil and dirt.

**02**

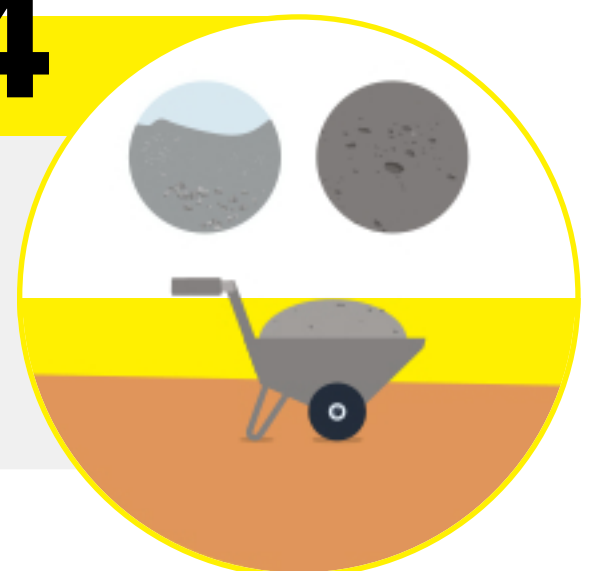

Because of the good gradation of the manufactured sand, strength of the concrete made of it increases.

**03**

The concrete made of manufactured sand does not have problems like segregation, honey-combing or capillaries and hence its durability is good.

**04**

As compared to the river sand, manufactured sand is an economical and better option and it is also good for the environment.
