

UltraTech Crack Filler
Frequently Asked Questions (FAQs)

1. Where do surface cracks appear?

Surface cracks are an unwanted and recurring problem found in most homes. They appear mostly on painted surface around door and window frames, electrical switchboards, false ceilings. They also appear on the joints of wall with other material like wood, tiles, granite, marble, etc.

2. Why do I need to fill surface cracks?

Surface cracks tend to grow rapidly to become an expensive problem. Because they are visible to everyone, they reflect poorly on us.

3. How can I fill surface cracks?

Repainting or touch-ups are full of hassles, time-consuming, and expensive. And even after these repairs, surface cracks tend to reappear.

UltraTech Crack Filler is an Innovative, Easy, and Affordable solution that enables you to fill surface cracks, joints, gaps, and holes by yourself quickly.

4. What is UltraTech Crack Filler?

UltraTech Crack Filler is an Innovative, Multipurpose, Do-It-Yourself (DIY) solution to fill surface cracks, joints, gaps, and holes. Its unique cement-based formula fills cracks from within, while Ultra Polymers give it a smooth finish. UltraTech Crack Filler is available in 4 popular colours – White, Cream, Light Yellow and Light Blue – and Transparent.

5. Where can I use UltraTech Crack Filler?

Coloured variants of UltraTech Crack Filler can be used to fill surface cracks around door and window frames, electrical switchboards, false ceilings, and joints of wall and another material like tiles, granite, marble, etc.

Transparent variant of UltraTech Crack Filler can be used to fill joints, gaps, and holes on wooden surfaces, tiles, granite, marbles, and stones.

Also, UltraTech Crack Filler is water-resistant, you can use it in bathrooms and kitchen with ease.

6. How do I apply UltraTech Crack Filler?

UltraTech Crack Filler comes in a unique, easy-to-use squeeze tube with a nozzle for a quick, non-messy application.

You can apply UltraTech Crack Filler in just 4 easy steps –

Step 1: Clean surface gently with a dry cloth to remove dust and loose particles

Step 2: Shake the Crack Filler tube well

Step 3: Direct the nozzle on the surface and gently squeeze to fill

Step 4: Smoothen the paste with the applicator cap. Gently wipe off excess paste from the sides with a cloth.

7. Will surface cracks re-appear after applying UltraTech Crack Filler?

Surface cracks tend to re-appear gradually. Re-apply UltraTech Crack Filler, if needed.

8. How long does UltraTech Crack Filler take to dry after application?

In dry/hot weather, UltraTech Crack Filler will take just 30 minutes to touch-dry. In wet/humid weather, it may take up to 24 hours to touch-dry. We recommend that you let the product dry for 24 hours after applying.

9. Can I use UltraTech Crack Filler to fill big and structural cracks?

UltraTech Crack Filler is suitable only for filling narrow surface cracks up to 4mm wide. It is designed for interior use only. Never use it for big and structural cracks or on load bearing cracks/applications.

10. What length of cracks can be filled with the large pack of UltraTech Crack Filler?

Large pack fills up to 37 feet of surface cracks (2mm wide and 1mm deep).
Trial pack fills up to 21 feet of surface cracks (2mm wide and 1mm deep).

11. What is the expiry date of UltraTech Crack Filler?

UltraTech Crack Filler is best before 24 months from manufacturing. After opening, it is recommended to use it within 6 months for best results.

12. How do I store UltraTech Crack Filler after use?

UltraTech Crack Filler is very easy to store for future use. Just cap the bottle tightly and store it in cool and dry place. We also recommend that after use, you clean the applicator cap with water or a cloth.

13. Can I use UltraTech Crack Filler in the bathroom or kitchen?

UltraTech Crack Filler is water-resistant and can be used to fill surface cracks, gaps, holes, tile and granite joints in bathrooms and kitchen. However, before applying dry the surface completely.

14. What are surface cracks?

With time, usage and change in weather, rigid material like paint, tiles, wood, etc. undergo expansion and contraction, resulting in formation of surface cracks.

15. What are the various packs in which UltraTech Crack Filler is available?

UltraTech Crack Filler is available in 4 popular colours and Transparent. The colored variants are available in 50g and 90g tubes while the Transparent variant is available in 40g and 70g tubes. If you wish to purchase it online, a 2-color pack is available.

16. Where can I buy UltraTech Crack Filler?

UltraTech Crack Filler is available at cement or hardware store near you. You can also purchase it online on Amazon.

17. Do I need to paint the surface filled with UltraTech Crack Filler?

UltraTech crack filler comes in 4 popular colors and transparent variant. It is designed to save you from the hassles of repainting or touch up of minor surface cracks. But if you want, you can apply any emulsion based interior paint over UltraTech Crack Filler, once it is fully dry.

18. Can I use my hands or fingers to apply UltraTech Crack Filler? Is it skin-safe?

For a quick, non-messy application, UltraTech Crack Filler comes in an easy-to-use squeeze tube with a nozzle. For smoothening the paste, you can use the applicator cap. This minimizes the need for skin contact. However, in case of contact with skin, you should wash the paste off by scrubbing with soap and water.
