**Prevent
thermal cracks
to protect your
reputation**

UltraTech

THERMOCON PLUS

Cracks on reputation are irreparable.

Monolithic landmarks projects are a great opportunity to showcase our competence and build an enduring reputation.

But such projects also run the risk of thermal cracking that can cause irreparable damage to our hard earned reputation.

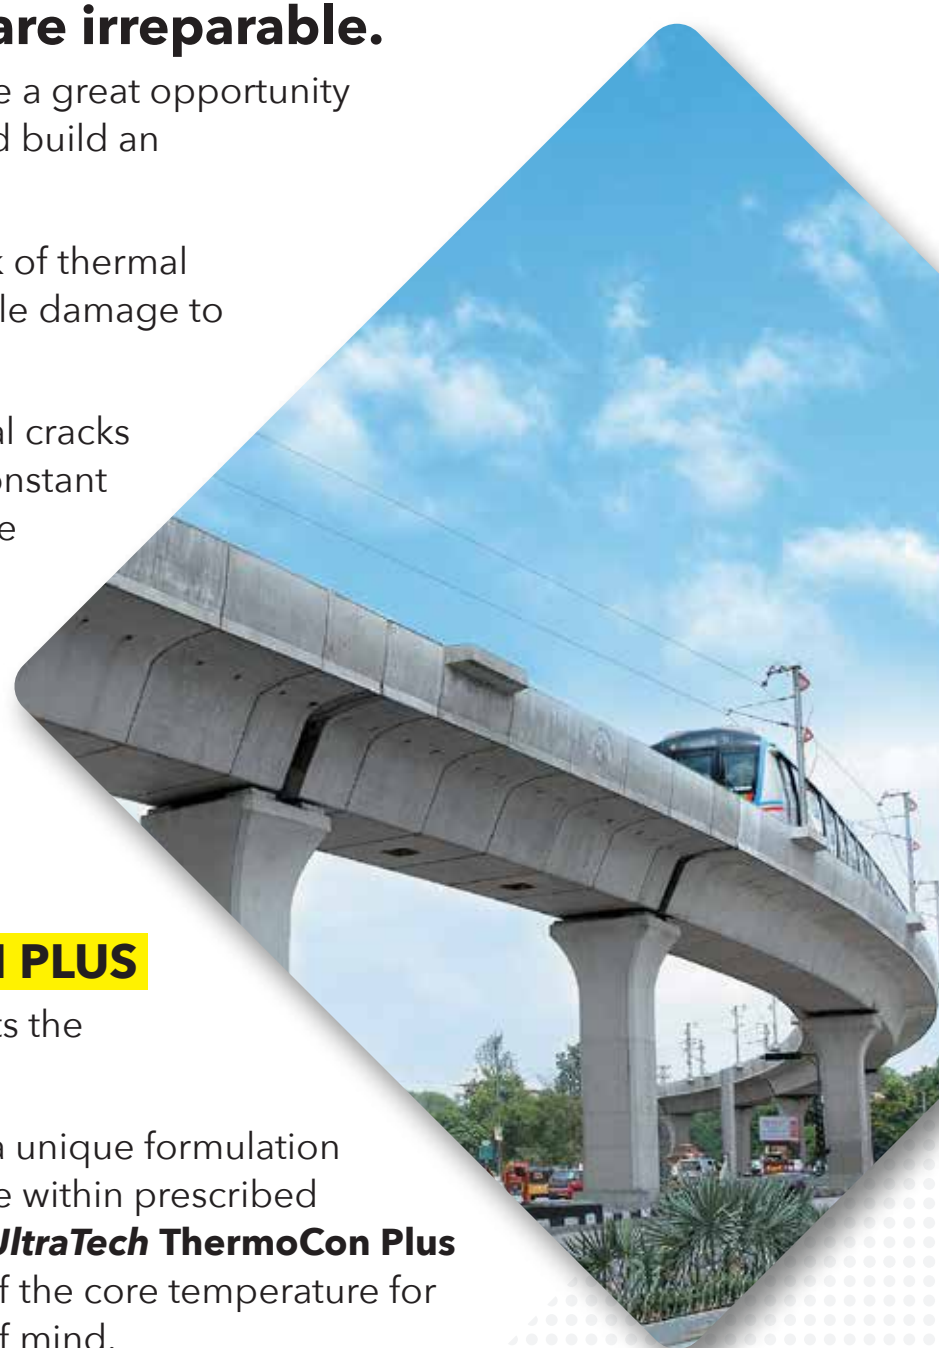

Current solutions to avoid thermal cracks are cumbersome and demand constant supervision. Lack of control on the process causes high anxiety and poses huge professional, legal and reputational risk.

Introducing **UltraTech THERMOCON PLUS**

An amazing concrete that protects the structures from thermal cracking.

UltraTech ThermoCon Plus has a unique formulation that restricts the core temperature within prescribed limits to prevent thermal cracks. **UltraTech ThermoCon Plus** also offers scientific monitoring of the core temperature for complete assurance and peace of mind.

**Why settle for the ordinary,
when you can build the extraordinary!**

Advantages:

- Prevention of thermal cracks
- No rapid loss of workability of concrete
- Lower placement temperature of concrete
- End to end solution

Technical Specifications:

- Differential temperature $<20^{\circ}\text{C}$
- Core temperature $<70^{\circ}\text{C}$

Application Areas:

- Mass foundations, rafts or structures with very high grade of concrete
